
Show / Hide Toolbar Method

[Dropdown hotspot](#)

Type your drop-down text here.

[Dropdown hotspot](#)

Type your drop-down text here.

[Dropdown hotspot](#)

Type your drop-down text here.

[Dropdown hotspot](#)

Type your drop-down text here.

[Expanding text hotspot](#)Type your expanding text here.

Setting up the toolbar method

1. Create the dropdowns and expanding text in the normal way.
2. Open the Skin Editor in the Project Set Up Pod.
3. In the Toolbar tab, click the Plus sign
4. In the Text tab, enter a name for the button, any text to appear on it, and any image required.
5. In the Action tab, select JavaScript and External JavaScript File..
6. Browse to the toggle.js file. (Copy it from this project to your project)
7. OK back out of the Skin Editor.
8. Add toggle.js to baggage.
9. Generate the help and test. Make sure you tick the new Show/Hide button in the wizard.

Twisties

The toolbar method will work with the Twisty method that ships with RoboHelp 8 and with T S Paul's method described in Twisties 1.
